Fancying a Pinsa Romana?

You will even more now... Roman Pinsa has less starch, less glutens, less cholesterol, less sugar AND less fats! The dough is also made using all-natural olive oil and contains no added shortenings, additives or preservatives throughout the recipe. The dough is made from a combination of soy, rice and wheat flour which makes Roman Pinsa a much healthier alternative to traditional pizza. The dough production process differs from your usual pizza as it's fermented for up to 72 hours and baked at a lower temperature. This ensures the dough is highly hydrated as it contains up to 80% water - leading to a number of brilliant health benefits!
